** MPOX vaccines are currently supplied from public vaccine stock, therefore there are no out-of-pocket costs for either insured or uninsured patients. If you have insurance, the health center will still submit to your insurance to obtain reimbursement for the administration fee. If you receive a bill for an MPOX vaccine, please contact us at billing@damen.org

*** If your visit is related to HIV, PrEP, or PEP only, the health center has federal and state funding available to reduce your out-of-pocket costs to \$0 to \$5, depending on your income. If you have health insurance, the health center will still submit to your insurance for reimbursement, but your out-of-pocket costs may be subsidized by federal and state funding if you wish to apply. If you do not have insurance, your out-of-pocket costs may be \$0 to \$5, depending on your income.

Patients needing laboratory testing and services completed by a reference laboratory (LabCorp) will be billed by the reference lab, even if the specimen was collected at Damien Center. Please reach out to LabCorp Patient Billing if you have any questions.
